

MOVABLE LIGHTBOX STAND

The new trend in visual communication is large format printing. The possibilities are endless due to the newest developments in fabric print techniques. A dynamic framing system that offers various solutions for fabric prints.

Easy Assembling & Fast Graphic Change

Movable Lightbox Stand are different than traditional lightboxes, where the graphic is snapped into place with a frame. To achieve the frameless look, the edges of the graphic are sewn with a strip that tucks into the channel of the light box profile. Assembling the frame and exchange of fabric print using the rubber strip can be done very easily and quickly by non-professionals without using any special tools, even during normal business hours. Ideal for situations where graphics are changed on a regular basis.

Homogeneous Illumination

No matter the size, you will have homogeneous lighting from corner to corner. The profile design guarantees that illumination will be dispersed evenly across the fabric graphic.

Movable Lightbox Stand • Led Rigid Bar

Working Voltage : 12v
Wattage : 14w
Length : 1000mm
Luminous Lux : 1700 lumens
Leds Brand : Epistar 3030
Beam Angle : 170
Lifespan : 50000 hours

Certification : CE / RoHS
Power Supply : 12V 200W power supply
Material : 100mm Cabo aluminum both side frame, Tension Fabric with Flatbed UV 1440' dpi Over printing
